About Me

I am a specialized WEB Next.js Developer with a strong passion for web development. My dedication to my work is unwavering—I devote 90% of my daily time to mastering my craft, continuously improving, and staying up to date with the latest technologies. Beyond front-end development, I also have experience with back-end technologies such as Node.js and Express.js, and I am currently exploring Nest.js to further expand my expertise. I thrive in a team environment, believing that collaboration fosters innovation and efficiency. My goal is to create high-quality, scalable, and maintainable applications while continuously pushing my own limits through self-learning and professional growth.
